Competency-Based Language Teaching (CBLT)

*“Rather than being organized around specific language topics, **CBLT** courses are developed around competencies and the skills necessary for mastery.”*

(Griffith & Lim, 2010; Richards & Rogers, 2001; Wong, 2008).

Module C - The Framework

- **Where?**

Classroom learning guided by the teacher

- **How?**

Pedagogically - Personalized learning plan in the form of reading materials according to the teacher's assigned competency

Didactically - Active learning, i.e. interactive video, questions with immediate feedback, gamification

The Story of The Bagel

Many Americans eat bagels, round rolls with holes in them, for breakfast. Bagel bakeries can be found in different parts of the United States, but mainly in New York. Most Americans do not know when and where bagels were first made.

Conclusion

1. We can design courses and assign learning plans based on competencies required for individuals or a cohort of learners.
2. Tagging competencies expands Moodle's capabilities of personalized learning.
3. Once created, a Moodle competencies matrix report will enable the course designer to cover all required competencies.
4. CBLT enables an analysis of the competencies in a given learning plan, vs. designing courses based on a subject knowledge.
